Acrobat® 6.0

Create PDFs

Scan, store and distribute paper documents

OCR

Colour

CardMinder

Fast

Easy to use

Always-on interface

One-button scanning operation

Colour duplex scanning

15 pages per minute

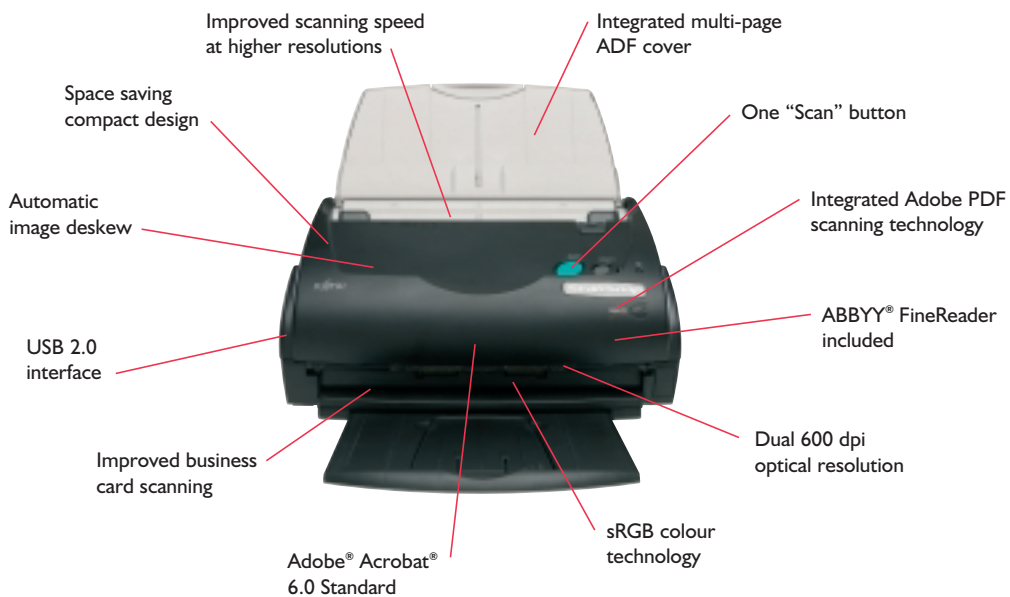

Simplifying your office every day

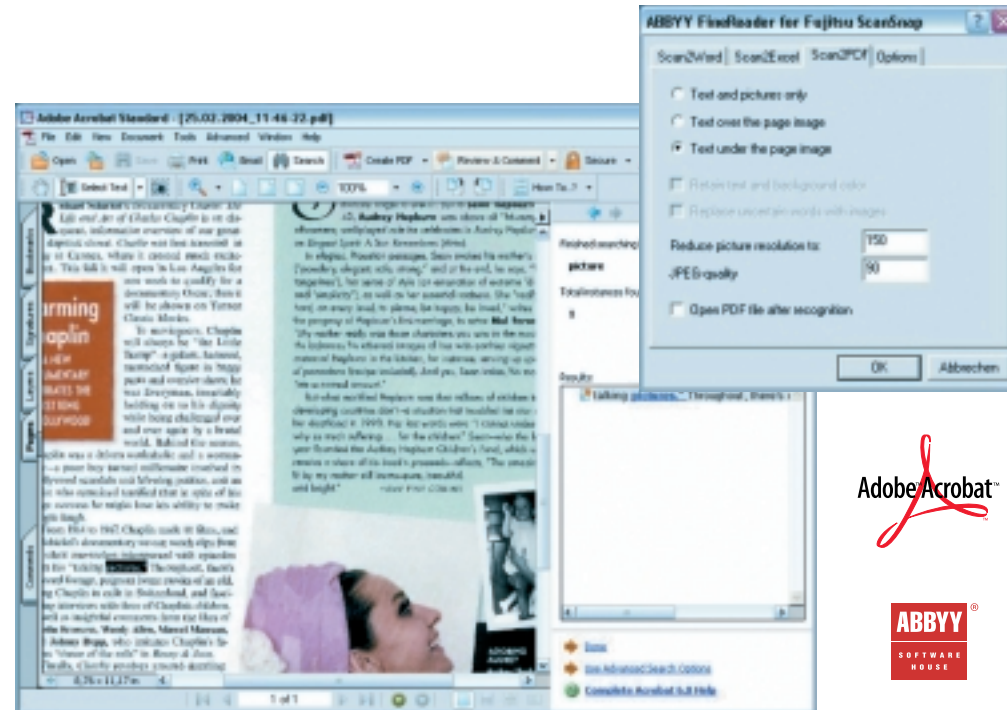

The Fujitsu ScanSnap solution brings high-end scanning technology to small to medium sized offices and business professionals at an affordable price. The scanner provides the user with a simple, fast, easy to use method for converting information contained on paper into digital Adobe® PDF files at the touch of a button. The ScanSnap scanner's 'one button' approach eliminates elaborate scanning applications and cumbersome driver interfaces. In addition, its 'always on' convenience, connectivity and small footprint allows the scanner to sit comfortably alongside the user at the office.

The Fujitsu ScanSnap scanning solution incorporates many features and functionalities usually only found in more expensive document scanners. ScanSnap transforms paper into useful digital information at speeds of up to 15 pages per minute for single sided documents and 30 images per minute for double-sided documents. Multi-page documents containing colour, black and white and text and graphic information on both sides can be processed into searchable PDF files with the bundled Adobe® Acrobat® 6.0 software. The resulting PDF documents are stored in the Windows file system on a local PC or network allowing the user to organise, share, protect and interact with this information as they would with any other electronic file.

The Fujitsu ScanSnap scanner connects the paper and digital worlds in a way that allows businesses to consolidate their paper and digital information all in one place.

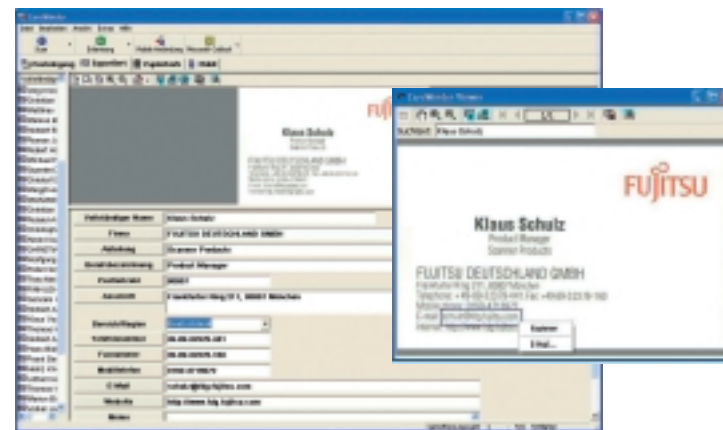

► Adobe® Acrobat® 6.0 Standard Full Version combined with ABBYY® FineReader for Fujitsu ScanSnap

Searchable original layout, 177 recognition languages and 7 different operating languages (English, German, Spanish, Portuguese, Italian, French, Russian)
